## *Majestic Manes Cattery Adoption Contract*

Good day,

You have reached out for a Majestic Manes Cattery Kitten. Good choice!

Our kittens are well loved, and hand raised in our small cattery from our home, this means that each one of our kittens are used to a lot of love and affection as well as premium care.

Our kittens will be vet checked, wormed and will have a flea prevention before they leave. We can also microchip and vaccinated for another \$150 to cover the vet cost. We like to reserve this as an option as we understand everybody has different budgets and should not have to stick to a schedule for vaccines if they cannot afford them at that time. Our kittens are 8 weeks upon collection and are potty trained as well as eating on our own. Your kitten will be used to being held in every way as well as being groomed and bathed. You will receive a go home box for your kitten which has their transition foods, Feed and water dishes, litter and tray with scoop, toys, care instructions, and adoption certificates.

Please note we do prefer our kittens to be fixed if they are indoor/outdoor cats and are not allowed outside unsupervised until they are at least 8 months old as they are still developing mentally and might not detect danger until it's too late.

If you decide to not fix your kitten, please keep them inside. We strive to be a responsible cattery and do not want our Cats reproducing with stray cats causing Bermuda's stray cat population to rise. If you would like to breed your kitten, please notify us upon Placing your deposit as there is a price increase on your kitten for breeding rights, we are trusting our new owners to be respectful, responsible and truthful to us when signing your contract.

Please note that if you must rehome your cat at any point, you can bring them to me and let me handle the adoption process. These cats are here because of me, while we would like to think they will be going to their furever homes, sometimes things do not work out as planned, in this case it is my responsibility to get them into another good home.

If you must bring the cat back for reasons that are of no fault to them, you will not be refunded. Refunds will only be issued if the cat has a serious health problem that the vets can verify came from one of the cat's parents or cattery.

Please note that there are many reasons why your kitten can develop behavioral issues and it is up to the new owners to stay on top of training as the first few months are crucial for setting boundaries for your kitten and avoiding behavioral problems.

If you find you need extra help with training, you can bring your kitten back (within two months of you receiving them) for a four-day boarding and training for free. Any time after this two-month period you will be required to pay a fee and prices will vary depending on the problems.

All kitten deposits are \$200.00 and are to be paid within 1 week of selecting your kitten to insure we do not have last minute drop-outs and are struggling to home kittens. The deposit also goes towards your final kitten price, Deposits are non-refundable. The final price of your kitten will be determined depending on the kitten of your choice and will be discussed before this contract is signed and a deposit is made.

The final price of your kitten must be paid in full before or upon collection of your kitten.
